FATIMA KASSEM

Full Stack Web & Mobile Developer

Lebanon | kassemf96@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Web and Mobile Developer currently working at a software company on a cross-platform Flutter product, while completing a Master 1 in Technology and Science of Information Systems. Experience building web and mobile applications with React, Next.js, Flutter, React Native, Java Spring Boot, Node.js and PostgreSQL, through employment, freelance client work and internships. Supervised around 10 interns across three internal company projects.

KEY SKILLS

Frontend: React, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, responsive design
Mobile: Flutter, React Native, Android (Java), cross-platform development
Backend: Java, Spring Boot, Node.js, REST APIs
Databases: PostgreSQL, MySQL, SQLite, Firebase
Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Android Studio, Figma
Additional: Code review, intern supervision, agile teamwork, UI/UX implementation, troubleshooting

PROFESSIONAL EXPERIENCE

Full Stack Developer | 2026 - Present
Software Company (name confidential) - Lebanon

- Develop the company's cross-platform mobile product in Flutter, backed by Java Spring Boot and PostgreSQL.
- Take features from design to delivery within a development team, using Git-based collaboration workflows.
- Supervised around 10 interns across three internal projects (Feb - May 2026): reviewed their code, guided their development process and helped resolve technical problems.

Freelance Full Stack Developer | 2026
Client E-Commerce Project - Lebanon

- Delivered a production-ready e-commerce web application end to end as the sole developer, using Next.js and Java Spring Boot.
- Built product listing and details, categories, search and filters, an admin dashboard and a fully responsive design.

Full Stack Web Development Intern | May 2025 - Jul 2025
Laptop - NutriBite platform - Lebanon

- Independently designed and built NutriBite, a multi-role food e-commerce platform, with React, Node.js, PostgreSQL and Tailwind CSS.
- Delivered authentication, order and menu management and role-specific dashboards for customers, kitchens, delivery drivers and admins.

Full Stack Software Development Intern | Apr 2025 - Jun 2025
Hobby Sphere - supervised by Dr. George Lebbos - Lebanon

- Worked within a development team on a full-stack activity booking application, owning React Native screens and Spring Boot backend endpoints.
- Implemented the payment integration and contributed through Git-based collaboration and code reviews.

SELECTED PROJECTS

Company Mobile App | *Confidential* | *Flutter, Java Spring Boot, PostgreSQL*
Cross-platform mobile product built as part of my current role; company and product details remain confidential.

Client E-Commerce Platform | *Confidential Client* | *Next.js, Java Spring Boot*
Full e-commerce web application with product catalog, categories, search and filters, and an admin dashboard.
