

FATIMA KASSEM

Full Stack Web & Mobile Developer

Lebanon • kassemf96@gmail.com • linkedin.com/in/fatima-kassem-4711382b0 • github.com/fatimahksm

SUMMARY

Full Stack Web & Mobile Developer currently working full-time at a software company on a cross-platform Flutter product, while pursuing a Master's degree in Information Systems. Hands-on experience across the full development cycle: React / Next.js frontends, Flutter mobile apps, Java Spring Boot and Node.js backends, and PostgreSQL databases — gained through employment, freelance client work, and internships. Open to freelance projects.

KEY SKILLS

Frontend: React, Next.js, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap

Mobile: Flutter, React Native, Android (Java)

Backend: Java Spring Boot, Node.js, REST APIs

Databases: PostgreSQL, MySQL, SQLite, Firebase

Tools: Git, GitHub, Postman, Android Studio, IntelliJ IDEA, VS Code, Figma

Languages: Arabic (native), French (good), English (intermediate)

PROFESSIONAL EXPERIENCE

Full Stack Developer — *Software company (name confidential)* 2026 – Present

- Develop the company's cross-platform mobile product in **Flutter**, backed by **Java Spring Boot** and **PostgreSQL**.
- Take features from design to delivery within a development team, using Git-based collaboration workflows.

Freelance Full Stack Developer — *Client e-commerce project* 2026

- Delivered a production-ready e-commerce web application end to end as the sole developer, using **Next.js** and **Java Spring Boot**.
- Built product listing and details, categories, search and filters, an admin dashboard, and a fully responsive design.

Full Stack Web Intern — *Laptop — NutriBite platform* May – Jul 2025

- Independently designed and built **NutriBite**, a multi-role food e-commerce platform (customers, kitchens, delivery drivers, admins), with **React**, **Node.js**, **PostgreSQL**, and Tailwind CSS.
- Delivered a working platform covering authentication, order and menu management, and role-specific dashboards by the end of the internship.

Full Stack Software Development Intern — *Hobby Sphere mobile app* Apr – Jun 2025

- Worked within a development team on a full-stack activity booking app, owning **React Native** screens and **Spring Boot** backend endpoints.
- Implemented the **payment integration** and contributed through Git-based collaboration and code reviews.

PROJECTS

NutriBite — multi-role food e-commerce platform (React, Node.js, PostgreSQL). github.com/fatimahksm/nutribite

Hobby Sphere — activity discovery & booking mobile app (React Native, Spring Boot, PostgreSQL).
